OVERALL OBJECTIVE

The purpose of this symposium is to encourage clinical consistency in skin and wound care through the utilization of the best research, expert opinion and theoretical reasoning available.

NEWEST SKIN CARE AND WOUND MANAGEMENT OBJECTIVES

Day One

- Identify the phases of wound healing and inflammation vs. infection.
- Differentiate the arterial wound and the venous ulcer by wound appearance, location, and surrounding skin.
- Distinguish the diabetic neurotrophic ulcer by wound appearance, location, and surrounding skin.
- Describe pressure ulcers and the importance of prevention interventions that impact patient care at the bedside.
- Review new adjunctive wound treatment modalities and their impact on wound healing.
- Describe surgical debridement and its importance in wound healing.

Day Two

- Describe the role of Hyperbaric Oxygen Therapy in wound healing and indications for treatment.
- Discuss the importance of nutritional and psychosocial interventions in wound healing.
- Identify the role of negative pressure wound therapy in wound healing and identify appropriate candidates for Negative Pressure Wound Treatment.
- Review available wound dressings, their indications, and appropriate utilization.
- Identify appropriate wound care interventions for select case studies.
- Discuss the role of the Outpatient Wound Care Center as an option for patient delivery of wound care.
